c. Edit/Update Tools categories:

To edit an existing Tools categories record, click on the Tools category's name and new screen appears on screen. To edit any item in list the user must have the required authorization.

d. Delete a record:

To delete a record, select it and then click on Delete icon  or press Delete key on your keyboard. The user may also delete the selected or multiple records. A pop up verifies your selection and then deletes the selected records.

Figure 6

Note: The Change log is displayed in View only mode.

g. Search Tools categories for keyword:

There are two types of search available to look for any keyword or filter the content of the module:

- i. Main Search: To search the document for any particular keyword, the Main search is used. Enter the keyword in the search box on top of screen and the keyword gets highlighted on the screen.

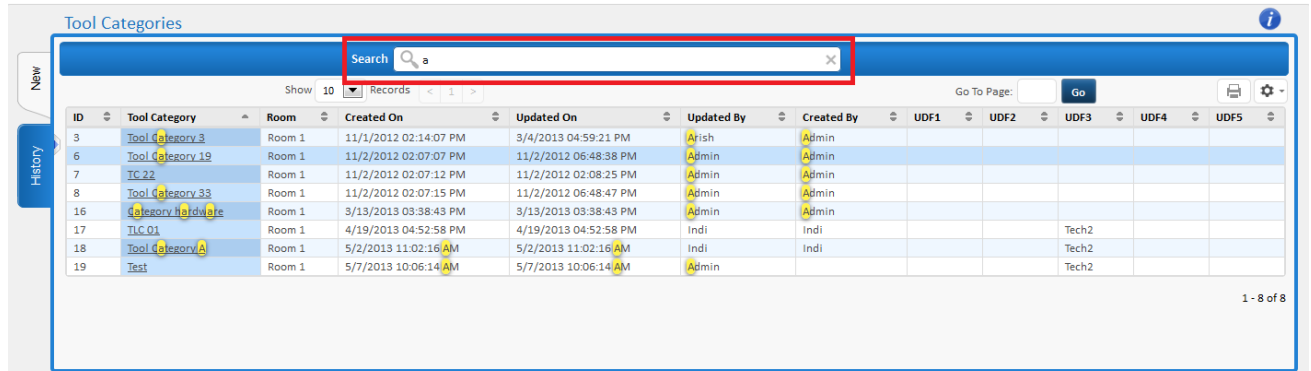

Figure 7

- ii. Narrow Search by: As the name suggests this function is used to filter or narrow down the scope of search for user convenience. It is an alternate search to the Search functionality and much detailed one.

- To open Narrow search, click on the small Triangular icon  on the top left corner of the screen.
- The following screen appears:

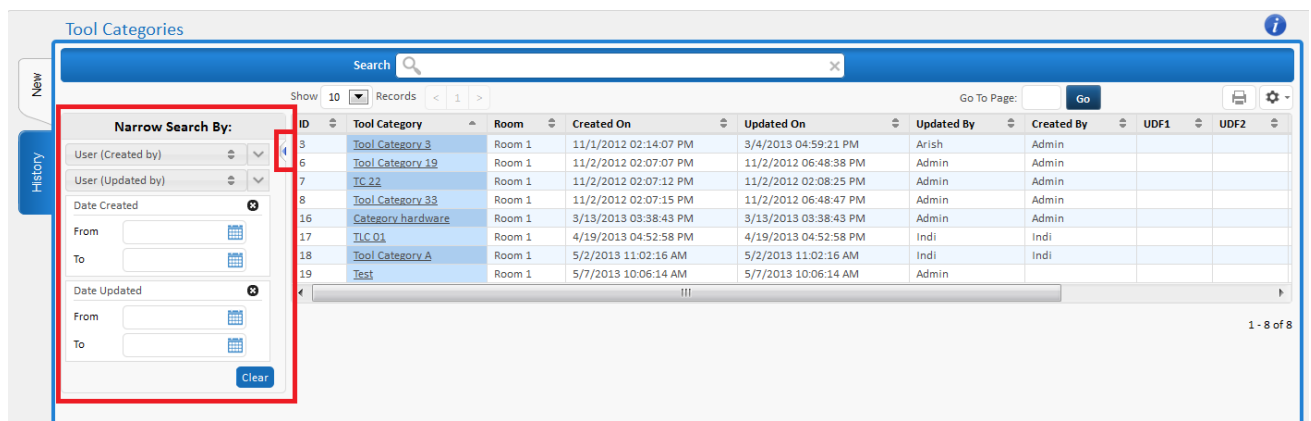

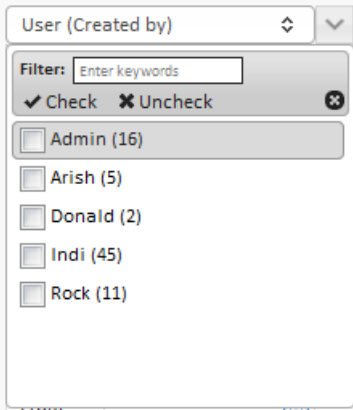

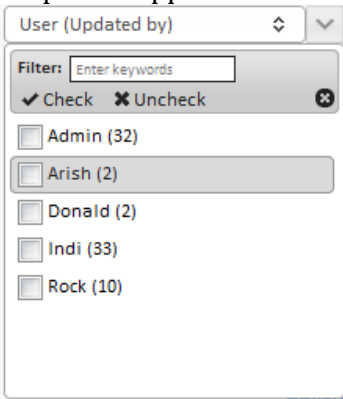

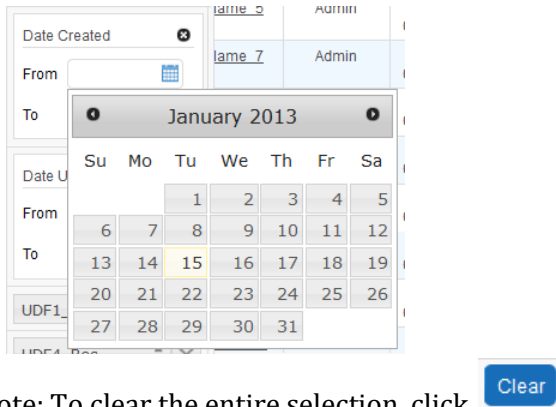

Figure 8

Field	Description
User Created by	<p>It is used to filter the module for the 'Created by' field. Click on up-down arrow key. Dropdown appears:</p>  <p>User can select or unselect all of the items of the list using Check or Uncheck button. The module reflects the filter selections made.</p>
User Updated by	<p>It is used to filter the module for the 'Updated by' field. Click on up-down arrow key. Either checks the pre-defined search filter or enter a new keyword in the Filter box and then click on Check. The module reflects the filter selections made.</p> <p>Dropdown appears:</p>  <p>Note: To cancel the selections made at any point of time, click .</p>
Date Created and Date Updated	<p>They are used to filter the 'Created On' and 'Updated On' fields respectively. User may enter the date manually or select from the calendar pop-up. Enter 'From-To' time period to be filtered. The module reflects the search results for the selected time period.</p>  <p>Note: To clear the entire selection, click .</p>

Note: At point of time only one of the either searches will work.

h. View records and Go to specific page:

The user is enabled to view particular records on the page and go to any page number directly. These functionalities can be accessed simply selecting number of records from the drop down and entering the page number to be displayed and click “Go”.

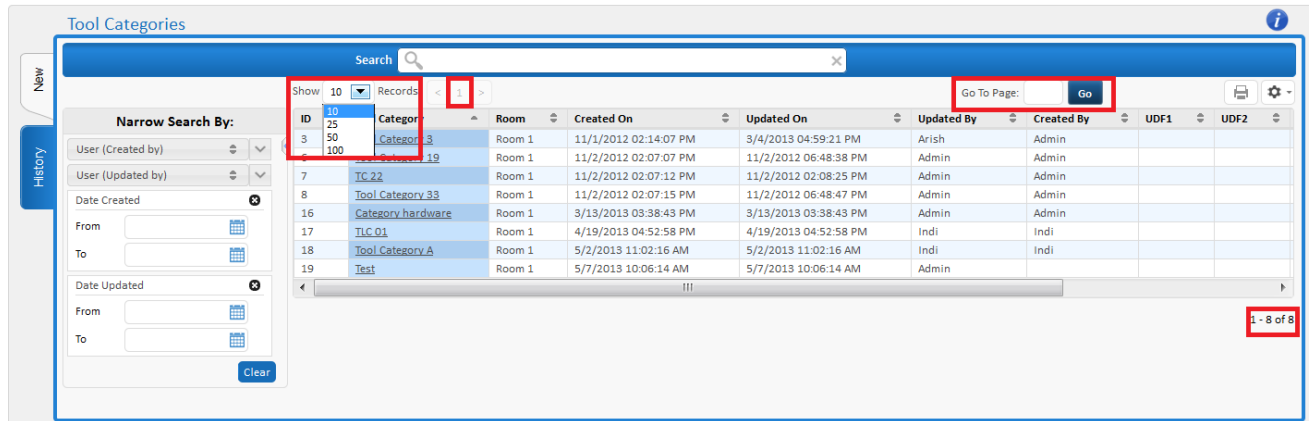

Figure 9

i. Implement various settings:

The user may choose from the below functionalities to be implemented on the module:

- Refresh:** This option refreshes the module and displays the latest changes implemented.
- Auto Refresh:** This option automatically refreshes the screen in specified time.
- Only Deleted:** This option reflects only the deleted fields of the module on screen. To select it, check the checkbox in front of the option.
- Only Archived:** This option reflects only the archived fields of the module on screen. To select it, check the checkbox in front of the option.
- Reorder:** This option enables user to reorder the columns of the module.
 - User can also select which field to appear on screen and which remains to be hidden.
 - Check or uncheck the checkbox in front of the field to display or hide the fields respectively.
 - User may also drag and drop fields to be arranged in order of choice.
 - After the selection is completed, click “Reorder”.

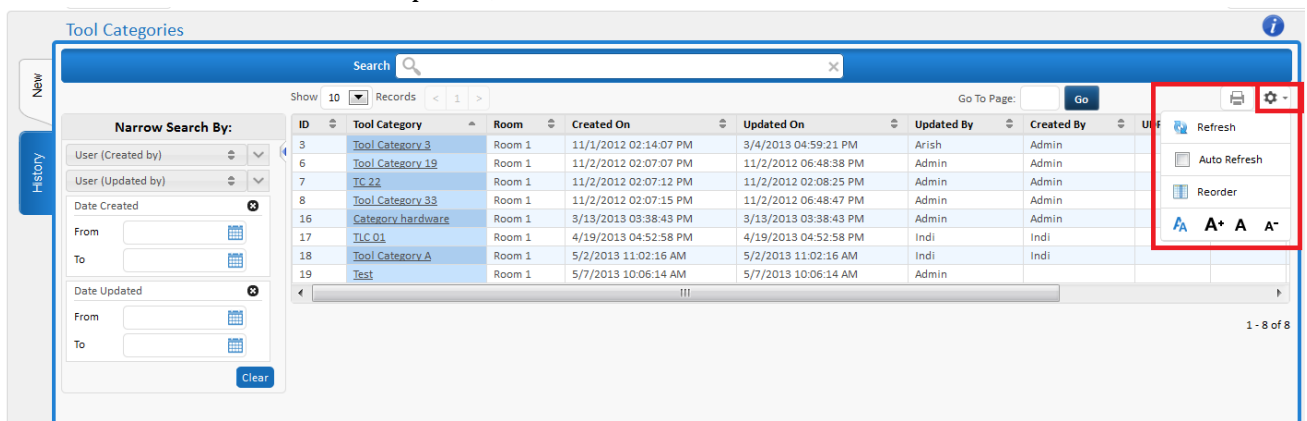

Figure 10

j. Miscellaneous settings:

Grid in History tab may have few of following functionality depends on requirements:

- 1) Resizing of columns
- 2) Re-ordering of columns using drag & drop of column header
- 3) Single column and multi column sorting (using shift key)
- 4) In-line editing

Multi selection of rows by clicking each row
